su. 35

This is Congressman Nick Rahall.

The Office of Management and Budget has recommended that a number of water projects be deleted from a House Appropriations Bill. Among those projects opposed, is an immediate \$10 million dollar appropriation for snagging and dredging along the Tug Fork Valley.

At the request of myself and Congressman Carl Perkins, this funding was included in the House bill. However, I see no justification what-so-ever in the Budget office's action and will continue to work to see that these much needed funds are retained to carry out a short term flood protection effort for the residents of the Tug Fork Valley.

This is Congressman Nick Rahall.
