Honorable Harley O. Staggers
Chairman
Interstate and Foreign Commerce Committee
House of Representatives
Washington, D. C. 20515

Dear Mr. Chairman:

* For your private information, I am enclosing a copy of
a work paper on an approach to the energy problem.

While this needs much refinement, there seems to be a
growing consensus among members of the Speaker's appointed task
force to move in this general direction.

Since your committee is vitally interested in several
important facets of the energy problem and since your personal
concurrence and cooperation would be practically indispensable
to the realization of any effective energy program, I wanted
you to have this.

* Hope you will have a chance to look it over carefully
and critically during the recess and then give us the benefit
of your own thoughts and advice in this general regard.

Very best wishes.

Sincerely,

Jim Wright
