Dear Mr. Getz:

This will acknowledge your letter of recent date. I appreciate your writing me and note with much interest your comments with reference to the fuel crisis and the recent strike by independent truckers.

It is certainly good to have the benefit of your views; and I, too, share your concern with the effect of the gasoline situation on our Nation's economy.

As you may know, the Energy Emergency Act was recently passed by the Congress and did contain a price rollback provision. Last week the President vetoed this measure, and the Senate sustained the veto. However, I am still hopeful that we can get an energy bill passed.

From your communication, I have also noted your views pertaining to Presidential impeachment proceedings by the House Judiciary Committee. I agree that the facts and truth should be made available in order to determine just what action should be taken.

Again, thanking you for writing and with every good wish, I am

Sincerely yours,

HARLEY O. STAGGERS

Dear Sir:

I would appreciate any information you could give me on the present laws concerning gasoline service station attendants selling gasoline only to regular customers. If there is such a law, I think it should be enforced.

Another thing while I am writing, I think Congress should do everything possible to find out about watergate and everything that is on the tapes between President Nixon and John Dean.

I think he should be impeached because I don't think he is capable of running the country. I believe he is letting the Oil Companies run him. Is it because of the large amounts of money that was paid into the campaign and now they want it back with a large profit on top of that.

I am in favor of taking income tax money to elect the President after all we pay it anyway and the big companies get the credit.

Now about the independent truckers. I believe there should be a roll back on the oil prices. President Nixon gives them higher freight rates to pass it on to the Consumer, now who is the consumer going to pass it on to. It seems as if too many things are passed on to the consumer. The President said cut down on electric, I did, I changed to lower watt lamps but still my electric bill was about three dollars higher than the two months before.

Yours truly,

J. Ray Getz
