United States Senate,
Honorable Kilgore,
Washington, D. C.

Sir,

Time is short you see on National Defense, which does not mean a thing. Time is late. Let me report for action.

Prior to National Defense in fact 1933 continuing on every hour to year 1940, I gathered increasing evidence, official documents, of many many fraudulent irregularities, conspiring to defraud the government of millions, very worst of crimes. In my continued efforts to present some to every official departments, Washington, D. C. to California and President Roosevelt, which only met with some sort of corruption with U.S. Department of Justice having U. S. attorneys in a unhealthy condition. Dishonest interferred federal investigation were conducted which I have full knowledge of. The precious federal guarantee of protection given to a mere hand full of work freedom, who have turned ennemies of our nation.

Right at the start fraudulent activities started in the most glowing fashion--hampering naval war preparation whether Pearl Harbor, Wake, Midway, Guam, Mare Island, here and there. To continue on would be nations suecide/ To allow any power to mere handful labor ~~you~~ ^{you} should be be termed treason. CZ-215

France-disaster and Remember Pearl Harbor, all ready forgotten as far as National defense is concerned.

If the administration still fears a mere hand full of Labor Czars, then I have concrete facts of high waste, blunding & Extravgiances easily cured.

These foes and some large contractors whom are get all defense jobs after making a mess of the last should be elliminated from Defense jobs.

War officials running around with Labor officials given them all serious. To take work freedom away from millions of government defense workers more serious.

Contact Honorable Tolan and Vorhis for merit my charges. Action on my chargers will be a long way to win the ~~xxx~~ war.

If member of any Committee will you take it up direct with some.

COPY

Also can refer you to Wm Davis brother H. P. Davis Nevada City, Calif.

Await action. Do not let knew set up fool you. We have had a series of this as my chargers and exposures extended the same strong hold is remain working.

Respectfully

A. W. Rogers
